

James Monroe Foster twins

These twins, born April 15, 1891, were the unnamed son and daughter of James Monroe Foster and his wife, Martha Ann Tibbs. The daughter died on the same day as birth, and the son lived 10 days.

James and Martha were married October 3, 1861. James was the son of John M Foster (1820-1900) and Martha Hale (1823-1890). Martha was the daughter of William Tibbs (1820-?) and Susan ? (1819-?).

James and Martha had children: James P (1863), Mary E (1865), John I (1889), Lafayette (1871), Sullivan (1874), and Monroe (1877).

Martha would have been 52 years old when these twins were born. Perhaps at too late an age for a successful pregnancy.

They were disinterred from T B Helm cemetery and relocated to Mt Holly. Their sister, Mrs Tom Fisher, was present at their disinterment.
